Instructions: All submissions received must include the words “Department of Homeland Security” and the docket number for this action. Comments received will be posted without alteration at <http://www.regulations.gov>, including any personal information provided.

**SUPPLEMENTARY INFORMATION:** On behalf of DHS, NPPD/IP manages the Department's program to protect the Nation's 16 critical infrastructure sectors by implementing the National Infrastructure Protection Plan (NIPP) 2013, Partnering for Critical Infrastructure Security and Resilience. Pursuant to Presidential Policy Directive 21 on Critical Infrastructure Security and Resilience (February 2013), each sector is assigned a Sector-Specific Agency (SSA) to oversee Federal interaction with the array of sector security partners, both public and private. An SSA is responsible for leading a unified public-private sector effort to develop, coordinate, and implement a comprehensive physical, human, and cybersecurity strategy for its assigned sector. SOPD executes the SSA responsibilities for the six critical infrastructure sectors assigned to IP: Chemical; Commercial Facilities; Critical Manufacturing; Dams; Emergency Services; and Nuclear Reactors, Materials, and Waste (Nuclear).

The mission of SOPD is to enhance the resiliency of the Nation by leading the unified public-private sector effort to ensure its assigned critical infrastructure are prepared, more secure, and safer from terrorist attacks, natural disasters, and other incidents. To achieve this mission, SOPD leverages the resources and knowledge of its

critical infrastructure sectors to develop and apply security initiatives that result in significant, measurable benefits to the Nation.

Each SOPD branch builds sustainable partnerships with its public and private sector stakeholders to enable more effective sector coordination, information sharing, and program development and implementation. These partnerships are sustained through the Sector Partnership Model, described in the NIPP 2013 pages 10-12.

Information sharing is a key component of the NIPP Partnership Model, and DHSDRS- sponsored conferences are one mechanism for information sharing. To facilitate conference planning and organization, SOPD established an event registration tool for use by all of its branches. The information collection is voluntary and is used by the SSAs within the SOPD. The six SSAs within SOPD use this information to register public and private sector stakeholders for meetings hosted by the SSA. SOPD will use the information collected to reserve space at a meeting for the registrant; contact the registrant with a reminder about the event; develop meeting materials for attendees; determine key topics of interest; and efficiently generate attendee and speaker nametags. Additionally, it will allow SOPD to have a better understanding of the organizations participating in the critical infrastructure protection partnership events. By understanding who is participating, the SSA can identify portions of a sector that are underrepresented, and the SSA could then target that underrepresented sector elements through outreach and awareness initiatives.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
